

Wanted - original 6-disc CD changer for an RV8

Wanted - original 6-disc CD changer for an RV8

Looking for a fully working 6-disc CD Autochanger, details as follows: Model Number CD082. Label on the back will include 'Rover' DIN type connector plug. Internals by Alpine (viz the blue eject button inside the sliding door). May come from an RV8, however the same/similar units were fitted to some of the early Rover saloons, and possibly early MGFs, between 94-98. In my case the Radio/Cassette unit in my RV8 is an original Phillips 22DC741 which this autochanger is compatible with.
