

THIS MADE ME SMILE

“From time to time you hear some fellow brag about his wife...

she can cook,

she’s easy on the eyes,

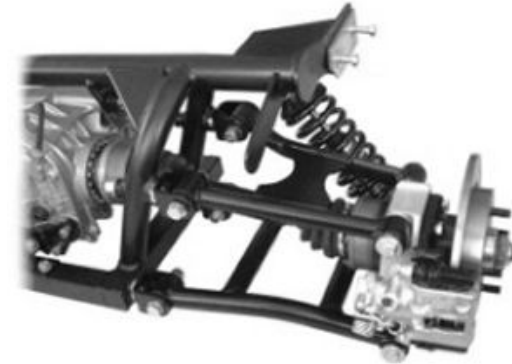

or she’s clever with crafts and the like.

All very good but how much is it worth?

My wife on the other hand, demonstrates a practical thought process, something that can be of much more value. After I set out the options for your front and rear suspension packages her comment was, “If we only drove the car to shows or on special occasions I would say no, but we drive it all the time so I think we should do it”.

Now who has the better wife!”

Leverett Flint
Boston, USA

The kit enables you to enjoy independent rear suspension with disc brakes. The back axle from a Ford Sierra or Granada can be used together with a Ford limited slip differential too.

The Hoyle replacement double wishbone, coil over front suspension system has been specially designed to overcome some of the criticisms of the original or other alternative options.
