- ❑ Low brake fluid sensor with an alarm – simultaneous red LED flashing with a beeper.
- ❑ High reliability with no moving parts, no contacts and no filaments.
- ❑ Replaces the standard plastic brake fluid reservoir cap.
- ❑ Plug connector is easily removed to enable the cap to be removed for manual brake fluid level checks.
- ❑ Reassuring LED flash and bleep when switching on the ignition.
- ❑ Low brake fluid response time is less than 1 minute.
- ❑ Easy to install with very detailed instructions.
