

## Private sale - set of new centre caps/cones for Dunlop composite wheels on an MGBGTV8

The background of this story is that I was looking for better centre caps or cones as I own my MGBGTV8, but they were out of stock everywhere or came up with a crazy price of over GBP 160 last year on eBay. Basically it was a personal project and I have a few sets left. The price just covers my costs for material, chrome, beer, time etc. If there is a bigger interest from fellow V8 Register members then I could try to produce further sets and we may come out with a lower price.

**A new set of four chrome finished centre caps** for the original Factory MGBGTV8 Dunlop composite wheels. The caps are identical to the original part number BHH 1060. These are not new old or original parts but are remanufactured to a very high standard and are very identical to the original - you don't see any difference when they are fitted to the Dunlop composite wheel. I produced the caps myself together with a good friend who owns the machines. It took us many, many hours in the evening, a lot of beer and over a year to get this perfect result. The centre caps or cones will come with MG badges fitted. **Price: £100 plus £10 shipping to GB.**
