

MGBGTV8 restoration project for sale

A longstanding member of the MG Car Club purchased this MGBGTV8 in Glacier White on 26th February 1975. A few years ago he decided to have the car restored and the work is in progress. The photos alongside show the first stage of the restoration is near complete which has cost a staggering £26,000 so far. Unfortunately the member's health has deteriorated and he is no longer able to drive or oversee the restoration. So the car as a restoration project in progress is now offered for sale. For the next stage of the restoration there are the complete parts for the car including the engine, gearbox, front and rear axles, wiring loom, interior trim and wheels etc.
