

Report on V8 Bulletin Board

The V8 Bulletin Board ("V8BB") is an online forum created and managed by the V8 Register which aims to attract good quality postings in terms of both subject matter and how they are expressed. Since the launch of the original V8BB it has succeeded in attracting good quality posts with real substance, usually with reference to either acknowledged sources (like workshop and parts manuals or other recognised authoritative sources) or to direct personal experience or knowledge to support the advice or views in the message, rather than simply bold assertions. The general style of the original V8BB has been polite and welcoming so many members who might not have posted messages on a forum find they have been able to do so on the V8BB as the system is so straightforward and there has been a low risk that a someone might respond with a barbed comment. So the emphasis has been on quality and not on quantity of messages on the V8BB. Access to the V8 Bulletin Board ("V8BB") is one of the benefits available to current members of the MG Car Club who have registered an MGV8 with the V8 Register.

Activity

With currently 718 registered members with access to the V8BB the total posts seen are 9,718 covering a total of 1857 topics. Recent activity in 2025 has been:

Typical views per post in July were 80 and replies per thread were 4.4. Data for July covers only 16 days.
