

Where to find the V8 Marquee and V8 Parking area at MGLive! 2013

As you drive down **the slope** from the bridge over the track (this is the second bridge you cross as you come into the central area at the Silverstone Circuit) to the roundabout, you will see the **V8 Parking area** to your right and the **V8 Marquee** directly ahead. At the roundabout, turn right and then after a short distance enter the **grassed V8 Parking area** which will then be on your righthand side.

Please note the grass V8 Parking area may be declared off limits in the event there is heavy rain in the days up to MGLive! such that the grass areas become waterlogged. The difficulty at Silverstone is that beneath the grass is a clay strata so natural drainage is poor and the waterlogged grass takes a long time to dry out. With the Formula 1 Grand Prix only a few weeks after MGLive! the management at Silverstone Circuit has to avoid cars parking on the grass when it is waterlogged for fear of damage.

Please note that if the grass areas are declared off limits for car parking because of heavy rain then the MG Car Club will have to adopt the WET layout – see our copy of the MGLive! WET layout via the link below.
