

Visit to the Hook Norton Brewery – a tour and lunch – on Friday of the MGLive! 2018 weekend

The **V8 tour group** end the tour of the brewery and prepare for the beer tasting session, then lunch in the new café attached to the visitor centre.

Following the tour of the seven storey brewery, the V8 group cheerfully sampled the range of beers brewed at Hook Norton. On the right is **Kai Knickmann**.

Tour guide (out of the photo) explains the former role of the 118 year old steam engine which provided the motive power for the brewery through bands and cogs. Today it is only run occasionally for visitors, now replaced by electric motors.

Additional photos very welcome

Any additional photos of the brewery tour and/or the lunch will be very welcome for this report.
