

Model MGBGTV8

Peter Ellis has sent in a couple of close up photos of details of the Universal Hobbies MGBGTV8 – the engine bay and Dunlop composite wheel. Remarkable detail.

Peter feels it was unfortunate that Universal Hobbies made various versions of the 4 cylinder MGB before going on to the V8 so the sump and exhaust manifold on the V8 are as for the standard MGB!

The actual 1/18 scale size of a V8 should be 218mm long x 86mm wide so both the Cult and Universal models are very close.

See the earlier photo report from Victor Rodrigues:
