Thin wall spark plug sockets for MG V8s

With the tight recess alongside a spark plug in a Rover V8 engine, owners of MGBGT V8s, V8 Roadster conversions and RV8s will find a spark plug socket that features a very thin wall to fit the narrow spark plug recesses on a Rover V8 engine very useful. Over the years many fellow V8 enthusiasts have resorted to simply grinding down a standard plug socket to get a "thin wall" socket, but **new thin wall spark plug sockets are available from at least two suppliers in the UK**. They are also available in the USA.

Laser Tools

Laser offer a set of three super-slim spark plug sockets (No 7295) that feature very thin walls to fit the narrow spark plug recesses often found in modern vehicles. Manufactured from chrome vanadium steel for strength and durability, they also feature a rubber insert in the socket to grip the spark plug safely. The sizes are 14mm (OD 18.49mm), 16mm (OD 20.82mm) and 18mm (OD 23.87mm) with a length of 63mm x 12 point (Bi-Hex) profile; 3/8"D. They are fitted with rubber inserts to protect and hold the spark plug. The set costs **£16.44** including VAT. See [Laser Tools website](#)

7295 Thin Wall Spark Plug Socket Set 3/8"D 3pc

A set of three super-slim spark plug sockets that feature very thin walls to fit the narrow spark plug recesses often found in modern vehicles. Manufactured from chrome vanadium steel for strength and durability, they also feature a rubber insert to grip the spark plug safely.
