

## Refurbished RV8 alloy wheels by Lepsons

Al Barnett says "I had my wheels done in the same manner by Lepsons some 2 years ago and they are still looking as good as the day I collected them. I give them an occasional clean with Solvol Autosol metal polish. I bought a few tubes at Stoneleigh a few years ago but I think it is still available. As it happens I was taking some photos yesterday for my Agreed Value policy with Peter Best. The wheels shine very well in the bright sunshine of Provence and I am looking forward to the 700 mile drive back home in a couple of weeks". See the photo of the front nearside wheel below.

#### **Refurbishing RV8 wheels**

Hugh Boddington set a V8BB thread running with the question "has anybody had any experience of stripping the lacquer from an RV8 wheel using Nitro Mors water based paint and varnish remover?" It soon became an active thread and finally David Sutcliffe from Australia posted details of how he had refurbished his RV8 wheels. (Dec 09)
