

### Checking the air filter on your RV8

Robin Plumley describes here how he checked the air filter on his RV8 and decided to replace the green filter with a new replacement K&N part.

My car had a **Green Air Filter** fitted (possibly since it was in Japan), and during some maintenance to the coolant pipes I decided to change it back to a K&N type. I have the correct cleaner and oil for maintaining K&N air filters.

I know Clive Wheatley has them on his [website](#) but by supplying dimensions with help from the team at K&N, I was recommended their **RC-2600 model** which is suitable for outputs up to 215BHP. It cost £39.59 including delivery.

See the [K&N performance filter store](#) online. [More](#)
