

100th RV8 gearknob auction

Terry Starkey has been supplying his handmade replacement Elm burr gearknobs for RV8s for several years and amazingly the 100th gearknob has just been made. It is a very special gearknob - a classic smooth shape, showing the beauty of the Elm burr with an inset MG emblem. It has been expertly made by a local wood turner in rural Norfolk.

Terry feels it would be good to see the gearknob auctioned to celebrate the 8th anniversary of the launch of the popular V8 website in May 2002, and then have the proceeds donated to a charity [charity names here].

You can bid online.

[in a box, links to details of bid procedure and rules and how to bid online via the V8BB plus the launch date of the bid and closing date and when and where the presentation of the gearknob will be made]
