

Automotech AS-4T36 car lift in use with John Hale

Ramp down, showing the shortened (and original) entry ramps which can be left in place to open and close the garage door.

Raised 600mm, ideal for interior and wheels & brakes, also good height for paint touch up on lower body.

V8 Register – MG Car Club

121221-Automotech-car-lift-in-action-JH8

Raised 1000mm, good for higher parts of suspension and reaching up round gearbox from the seat.

Raised 1200mm, best for all major work underneath. Highest I can go under the beam.
