

Private sale - reimported RV8 in Woodcote Green

Woodcote Green 1449 (1995 M) is in excellent original condition with many sought after options and extras. The car returned from Japan with 32,540kms (20,219 miles) and I registered the car on its return so I am the only owner on the registration document. Since registering the car in the UK in October 2009 I have covered a further 1,690 miles only. The car is perfect and the body is unmarked as is the interior. Screen frame and wheels are all original and in excellent condition. I changed the indicators to clear lenses but all original parts are included in the sale and the car has a Terry Starkey gear knob (original also included). The car has its original Panasonic radio cassette and CD autochanger, original overmats and half and also new full length tonneaus. The Air Con works perfectly. I have also fitted new tyres which transformed the handling and the car also has a full Clive Wheatley stainless steel large bore exhaust system (original system with the car) and Clive Wheatley bump stops etc. The car has full complete original tool kit, handbook pack including a Japanese service book, spare keys and spare alarm remote and also a set of RV8NOTES on a CD with the workshop manual. I looked at a lot of RV8s before I found this one and I am only offering the car for sale as I have started racing MGs this year. The car is currently on a SORN and will have a 12 months MOT. Please feel free to phone or email for more information or extra photographs. **Price £13,500 ono.** 230511
Contact: Frazer Graham on **01900 872549** or fmag@btinternet.com .
Location: Workington, Cumbria
