

Private sale - UK spec RV8 in British Racing Green

Private sale - UK spec RV8 in British Racing Green

BRG 0320 (1994 LReg) was first registered in the UK. It is a very early example of a UK specification car. UK cars are very rare as most RV8s were built for export to Japan. It has only done just over 30,000 miles. There are a few stone chips. Alloy wheels have light corrosion for a 1994 car. The hood and rear screen are excellent. Unmarked leather seats. The gearknob was replaced with one of Terry Starkey's stunning, burred elm knobs a few years ago. (I still have the original which you can have.) Mats in the driver and passenger footwells are fitted optional extras as well as having a full tonneau and toolkit. The original Philips Radio was replaced with a Blaupunkt Radio/CD player. MOT to July 2011 and tax to April 2011. Garaged since it was bought in 1997. SORN every winter for the last few years under a cotton car cover. Never used on salty roads or in the wet. There is a space saver wheel in the boot, and the original spare wheel will be part of the deal. **Price £12,900.** (11.10.10)
