

## Private sale – reimported RV8 in Oxford Blue

## Private sale – reimported RV8 in Oxford Blue

**Oxford Blue 1142** (1995), a Japanese spec car with a translation of the Japanese service history, was returned to UK in February 2005 with one owner in Japan. Then two former UK owners both sold the car for genuine reasons and I purchased the car in January 2007. Current mileage 27,500 with MOT until 26th March 2011. In addition to routine servicing, much work maintenance work and several useful upgrades have been carried out since returning to the UK including new tyres, Spax shock absorbers, an upgraded radiator and central locking. The bodywork, wheels, windscreen surround, interior including the elm burr trim are all in excellent condition. Air conditioning is in perfect working order. Half tonneau and toolkit included. This car has won 3 condition awards within the last 18 months at local MG events. Price **£15,750**.
