

## Rebuilding an MGBGTV8 – Damask 0450 (Part 24 of a series of reports)

Just an update to let you know that Damask 450 is back on 4 wheels (see photo). The shell is complete, all the lead loading has been done, and the entire underside has received a thick coat of stone chip. After a light skim of filler over the leadwork, the shell will be ready for painting. (7.6.10)
