

## Rebuilding an MGBGT V8 – Damask 0450 (Part 29 of a series of reports)

Barrie Jones reports - Damask 450 is now fully painted, and I have fitted all the wiring, brake lines, fuel line, dashboard, suspension and brakes. The top photo shows the fuel line with a Filter King fitted and the lower the wiring and relays in the engine compartment. Next step is to hoist the engine back in, with gearbox and overdrive already attached. Then all I have to do is fit the internal trim and get her tested for roadworthiness. Won't be long now. 070111
