

Where can I find the engine number on a Factory MGBGTV8?

Engine number is stamped on a plate at the rear of the left hand cylinder head and can be read (see above) by standing next to the nearside wing and taking a line of sight from over the windscreen washer fluid bottle down by the rear of the rocker cover to the plate adjacent to the bellhousing. The number can be difficult to find and is in the format **4860NNNA** where "NNNN" is a four digit number.
