

TAILOR MADE COOLING KIT MGB V8

Revotec's bespoke cooling kit has been carefully developed to provide perfect cooling for your MGB V8, overcoming all mechanical fan shortcomings. Upgrading to an electronic fan increases fuel economy, reduces engine warm-up time and ensures sufficient engine cooling and protection in modern traffic conditions.

The cooling kit uses a set of blowing fans matched to the radiator. The fans fit neatly in front of the radiator, creating a very neat standard looking engine bay whilst increasing performance and cooling.

- Custom engineered to fit and cool your MGB V8
- Supplied complete with all necessary fittings and fixings for a professional electronic fan conversion on your classic car
- Engineered to fit without any permanent modifications and utilising original radiator mounting bolts
- Easy to fit with basic hand tools
- OEM components used throughout
- Latest fan and controller technology used together for the ultimate cooling package

Each Kit contains:

A Revotec variable temperature electronic fan controller (adjustable from 70-120°C)
Two General Cab OEM quality high power 9" Blowing fans, (which features: bearings, continuously rated operation, balanced, low profile and high output).
A set of laser cut, aluminium mounting brackets complete with all necessary hose clips and fittings required for a professional installation.
