

## Templates for V8 Paperweights

**Oval V8 Paperweight** – size: **102mm** across by **72mm** high (not to scale above)

**Round V8 Paperweight** – size: **90mm** diameter (not scale above)

When indicating which part of your photo you want in your Round or Oval V8 Paperweight, concentrate on drawing your circle or oval on a photocopy of your photo. The oval or circle you draw on the photocopy does not have to be to the sizes above – just ensure it is located over the portion of the photo you want. Our paperweight supplier has the ability to resize and crop your photo to fit. So if the portion of the photo you want in your V8 Paperweight is smaller than either the 90mm diameter (Round) or 102mm by 72mm (Oval) shape do not worry, our supplier will enlarge that portion of the photo to fit your Round or Oval shape.

Similarly if the portion is larger than the Round or Oval shape, the supplier can reduce the photo. The key thing is you provide clear indication of what part of your photo you want in the Round or Oval shape.
