V8 Technical Day 2019 – programme – Saturday 1st June 2019

Aim of the day is to provide a compact series of presentations on topics which will be interesting and topical for fellow MGV8 members. The presentations will be supported by sets of well-illustrated slides. There will be refreshments on arrival, a buffet lunch and afternoon refreshments.

Refreshments on arrival – tea and coffee with homemade cakes and biscuits. Prompt start at 1010 Welcome to the "Jack Peers Centre" Charles Peers will give a little history of the Centre 1015 Replacement 5-speed Mazda gearbox for an MGBGTV8 Presentation describing the kit and how it performs in an MGV8, what is involved with an installation and any necessary modifications, who can supply and install the kit, and what are the costs. A fellow member who has recently had the Mazda gearbox installed in his MGBGTV8 will support the presentation. Followed by a short Q&A session. 1115 Are waterless coolants a worthwhile option for an MGV8? Presentation describing what waterless coolants are and their claimed benefits, then an assessment of waterless coolant products ending with a recommended choice of coolant for an MGV8. Followed by a short Q&A session. 1215 Trackers help secure your MGV8 and aid a successful recovery if it is stolen Presentation describing what a tracker can do by monitoring a classic car, by notifying you of any disturbance to the vehicle, how a tracker options, how they are installed, what 24/7 monitoring services are available and what are the costs of the kit, installation and monitoring services. Followed by a short Q&A session. 1300 Buffet lunch Buffet lunch Booking arrangements are on the V8 Website, followed with homemade cakes and men MGV8. V8 Technical Day 2019 - programme - Saturday 1st June 2019

Additional topics

The event information provided on the V8 Website has invited members to submit questions on the published presentations and also questions on an additional two or three topics. The session planned for 60 minutes from 1500 to 1600hrs will take the form of a Q&A session.

Are parabolic rear springs a good idea for an MGBGTV8?

Chris Bound suggests this topic as he is intending to fit Bilstein telescopic dampers at both ends of the car and need to replace his (very tired) rear springs at the same time. His question is "are parabolics the way to go and, if so, should I also fit a Panhard rod while I'm at it? It would be good to have some feedback from the experts".

. How is a VHI declaration recorded by DVLA?

This topic has been running on the V8BB with contributions from Peter Berry, Chris Bound, Barrie Franklin, Chris Hunt Cooke and Mike Howlett.

See the V8BB thread at: http://www.v8bb.co.uk/viewtopic.php?f=2&t=1233

• Is it true that the water temperature gauges on MG RV8s are designed not to show a temperature more than normal?

Geoff Martin has raised this question and it's one many RV8 owners would be pleased to have the answer. There is an RV8NOTE on this:

http://www.v8register.net/FilesRV8WN/RV8NOTE207-temperature-gauge.pdf

. What are the benefits of premium motor fuels?

Paul Keeler seeks the views and experiences of panel members with the Premium Fuels now being offered by the major fuel retailers as he has seen "Premium performance fuels like Shell's V-Power Nitro +, BP Ultimate (recommended by Ford!) or Texaco Supreme make promises to clean and protect your car and even help squeeze more miles from your tank". Basically these super fuels or high performance fuels are petrol with a higher octane rating plus additives to clean (BP Ultimate is advertised as 'dirt busting') and protect the engine. Most standard brands of fuel have a 95 octane rating, however super fuels typically have a higher rating - around 98 - which can (it is alleged and is presumably a logical inference) make the engine work more efficiently and improve performance. How does this translate into our MGs? Any differences between using these for running 1800cc twin SU MGBs to for example an MGBGTV8 or 3.9 litre fuel injected RV8? There is a price differential (circa 10p/l) but our MGs tend nowadays to have very low annual mileages so not a major consideration. I tend to use these premium fuels for the occasional tank top up in my Land Rover diesel, but very hard to say if there is any difference.

RV8 wheel centre fixings – a security upgrade

Practical demonstration of the new security bolts for RV8 alloy wheels and the improved "Allen" key highlighted by John Anthistle in his RV8NOTE448. Any questions will be welcome.

Catering

The catering for the event will be arranged by Lesley Smith with the welcome support from Carol Brown and Sheila Cumming.
