Private sale – low mileage MGRV8 in Woodcote Green

Woodcote Green 1800 was first sold new in Japan in April 1998, then sold back to the supplying MG dealer in April 2001 when it had covered 9,800 miles. From April 2001 until October 2004 it was used as a showroom exhibit. After that time it was purchased by Classic Sportscars and brought back to the UK. Fred Jenns described it as the best Japanese example RV8 he had ever seen. Its history and journey back to the UK was described in the December 2004 issue of Safety Fast magazine. I purchased the car in November 2004 and have owned it ever since. The car has always been stored in a dry garage and has only been driven occasionally in the summer months and never in the rain. As such, the interior and exterior of the car is close to immaculate. Since I purchased the car in 2004 it has covered just 3,047 additional miles, making a total today of 12,847 miles. Asking price **£19,995**
