

How much does the average web surfer see on our webpages?

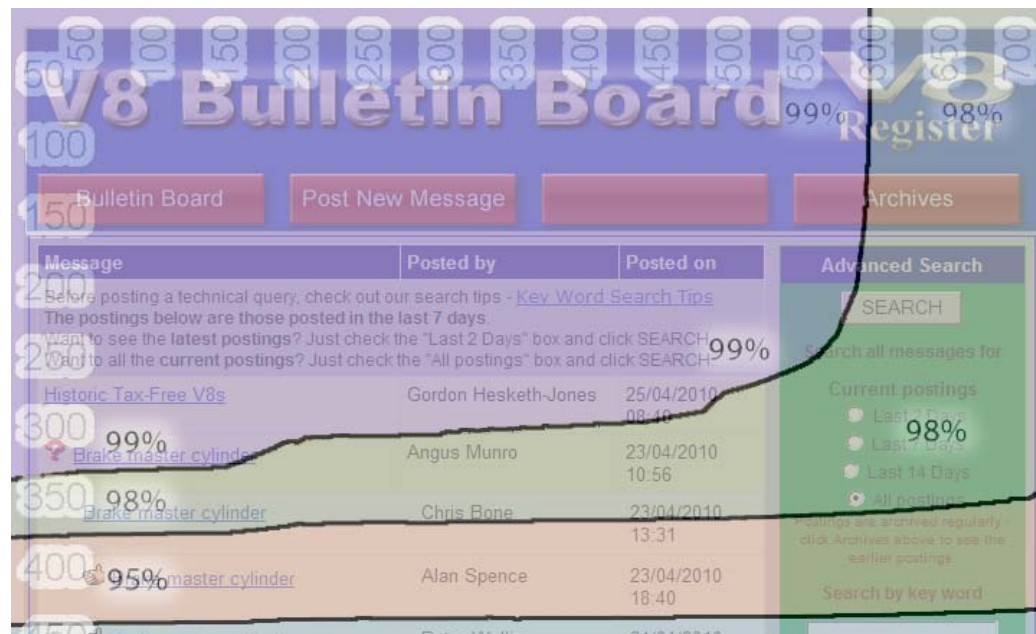

How much does the average web surfer see on our webpages?

An interesting "Tech Tip" article in the Sunday Times today urges readers to try using Google Browser Size, a Google service "based on data captured from hundreds of millions of hits on its home page." So we have checked out several V8 Register webpages, and the MG Car Club website homepage too, to see what the user contours look like. See where the 99%, 98%, 95% and 90% user contours pass.
